

# Stuffed Toy Taxidermy Craft

## Supplies Needed:

- Plain wood plaque
- Paint and paintbrushes
- Scissors
- Glue gun and glue sticks
- Stuffed toy

## Step 1:

Paint the wooden plaque.

## Step 2:

While the paint dries, carefully cut a diamond shape around the neck of the stuffed toy. Cut a small slit at each corner of the diamond. Remove stuffing as needed.

## Step 3:

Arrange the stuffed toy head on the wooden plaque. Place a small amount of glue on the edge of one side of the diamond and then fold it under, pressing down to secure it in place. Repeat until all four sides are glued down.
